

1 year since the first Marineff project newsletter! Since then we have...

Designed 4 bespoke eco-engineering modules

Manufactured over 200 units with robust concrete formulas and custom formworks including:
150 artificial rockpools
36 breakwater blocks
30 oyster prisms
3 boat moorings

Hosted 2 workshops and given 13 talks at conferences, webinars and events

Appeared on French TV and prepared 5 scientific papers for publication

WHAT'S NEXT?

Although we have experienced delays due to the pandemic, we are now back on track and mid-way through deploying our eco-engineering modules. We are still unable to host face-to-face workshops but will be hosting a live public webinar in autumn 2020, which we will advertise on social media and to newsletter subscribers.
